## Firewall Models

### Namek UTM Firewall 200C

- 2+ Gbps of firewall throughput
- 4GB DDR4 RAM supports 600-1000 concurrent users (upgradable to 16 GB)
- 6x Intel Gigabit NICs (WAN / LAN Interchangable)
- Comes with high quality 32GB mSATA SSD for OS
- Supports direct HDMI output for troubleshooting

### Namek UTM Firewall 150B

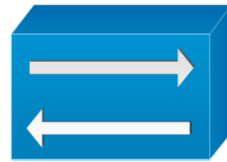

- 800+ Mbps of firewall throughput
- 4GB RAM supports upto 300 concurrent users
- 3x Intel Gigabit NICs (WAN / LAN Interchangable)
- Comes with high quality 16GB mSATA SSD for OS
- Supports RS232 Serial COM port for troubleshooting

## Firewall Features

### Stateful Firewall

- Interface based Rules
- Control routing between interfaces
- Protect your network from hackers

NAT

### NAT / Port Forwarding

- Many to One NAT for Port forwarding
- One to One NAT to use multiple IP addresses on a single WAN connection

### VPN

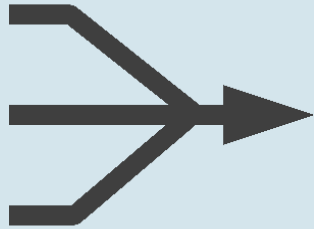

- Remote access VPN: Unlimited VPN clients available for PC / Mobile
- Site to Site VPN: Connect your branch offices to your head office for intranet access over any internet connection

### Dynamic DNS

- If you don't have a static IP, but need to configure VPN or port forwarding for various applications like DVR, Web, FTP
- You can integrate our firewall with many popular dynamic DNS providers Like N-IP or DynDNS

## Firewall Features

### WAN Load Balancing

- Multi-WAN Load balancing to use multiple ISPs at the same time (either in failover or load balancing mode)
- Combine multiple WAN links
- 3G / 4G Support

### Web Filtering Options

Multiple Web Filtering options:

- Using Built-in Web Proxy for content filtering
- Using DNS based filter like OpenDNS for easy to use high performance Domain based filtering

wifi web login

### Captive Portal

- This feature allows you to force login via username / password or voucher code.
- This is commonly used on Wi-Fi hotspot networks (malls, coffee shops, hotels, airports)

### System Graphs Various System Graphs:

- Memory usage
- CPU usage
- Packets per second (PPS)
- Realtime Traffic Graphs
- Interface Statistics (IN / OUT)

## Namek Firewall Unique Features

### Two Factor Authentication

- Provide Secure Internet Access with username / password + OTP
- OTP can be generated using Google's Authenticator App. Available for Android / iOS / Chrome / Windows

### Google Drive

### Auto backup to google drive

- Hassle free automatic firewall configuration backup to your Google Drive account.
- Backup multiple versions in case of a system reinstall.

### Mobile Optimized User Interface

- Configure the firewall using any mobile device with a smaller screen.
- Provides easy configuration access for administrators travelling or out of the office.

### Bandwidth Reporting

- Detailed information like packet flows including source, destination ip and port number
- Export usage reports to CSV files
- Bandwidth Reporting based on Cisco's Netflow Protocol

## Namek Firewall Unique Features

### No Subscription Fees

- No Annual subscription charges
- No licensing fees
- Support available on an annual or per-call basis.

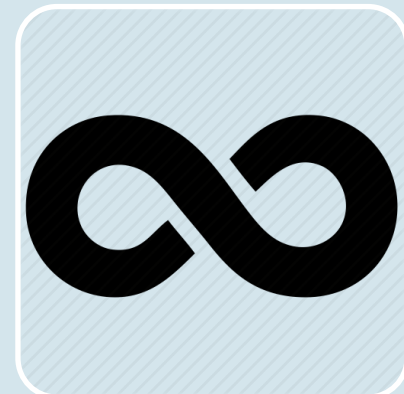

### Lifetime Free OTA Updates

- Lifetime free security updates
- Lifetime free software / features updates
- Completely vendor neutral.

### Customizable Software

Extend the functionality of the firewall beyond the core components through the use of plugins.

### No User Limit

- No defined user limit
- Capable of 300+ users with 4GB RAM
- No user-based pricing

## Namek Vs Commercial Firewalls like Fortinet / Cyberoam / Sonicwall

### Lowest Price to Performance Ratio

- Supports a very large number of users (300 to 500 concurrent users) For a very low price
- One time purchase
- Lifetime free updates

open hardware

### Open Hardware

- Upgrade RAM / SSD at any time
- Upgrade or even replace the operating system at any time
- Dual storage options - mSATA SSD + 2.5" SATA HDD

### Power Efficient

- It consumes only 15W of power
- Uses Standard 12V DC Adapter

### Highly Reliable

- Premium Aluminum Chassis for better cooling
- Supports 24x7 operation in a variety of conditions

## Why Us?

open source

### Open Source

- An Open Source software product provides best in class security
- No single vendor dependency
- Reliability and long term use

### Technical Expertise

- Over 10 years of experience in IT Security Industry
- More than 500+ firewalls deployed at companies of all sizes
- Technical Support available for a variety of network scenarios.

### Various Use Cases

- Our firewalls are being used in a variety of scenarios:
- Web Filter
  - Load balancing and failover
  - VPN for site to site connectivity
  - Providing secure Wi-Fi access at hotels to guests

### Easy Returns

- Get easy returns all over India. Call technical support and log a return request
- Send your faulty device to our head office.
- After inspection, a replacement device will be shipped **within 48 hours.**
